

## TRUIST PIER 225

CALIFORNIA  
SEA LION

How many sea lions do you see?

---

We sometimes have a harbor seal guest with our sea lions! Check the box next to them if you find them!

HARBOR  
SEAL

A sea lion and seal may look the same,  
But take a moment to play this game.  
Both can be found on man made piers  
But sea lions have a flap on their ears  
Seals move like a worm on land  
While sea lions walk through the sand.

USE THE SPACE BELOW TO DRAW YOUR FAVORITE ANIMAL THAT YOU SAW TODAY!

## DOLPHIN COAST

The entire habitat is dedicated for Atlantic bottlenose dolphins. They are mammals just like humans!

ATLANTIC  
BOTTLENOSE  
DOLPHIN

How many dolphins do you see?

---

Ever wonder how a dolphin can breathe?  
They live in the water, but do they ever  
leave?

Dolphins get their air a different way  
Have you ever seen a dolphin spray?  
That's them breathing out  
From a blow hole not a snout.

## SHARKS! PREDATORS OF THE DEEP

GREAT  
HAMMERHEAD  
SHARK

TIGER  
SHARK

SILVERTIP  
SHARK

SAND TIGER  
SHARK

Many humans think I look scary,  
I think humans should be merry  
For when they see how good I am  
They'll learn my presence is the jam,  
As I protect the vast ocean  
Always swimming in a constant motion.

## Field Guide: Quizzical Quest Grades K-2

Georgia Aquarium is home to so many different types of plants and animals. Can you find all the animals listed in this guide in each gallery? Check them off as you spot the animal! In Tropical Diver you will find all manner of colorful fish and in Ocean Voyager, you'll see some of the biggest fish to swim the ocean! River Scout houses animals that you might be able to find in your local waters, and our new Sharks! Predators of the Deep gallery houses some of the ocean's most efficient predators. The other galleries in the Aquarium house animals just as exciting and breath-taking so have a look around!

Note to teachers: There is a brief poem included with each gallery. Teachers may read the poems to students or allow them to read on their own.

GEORGIA AQUARIUM

Cognia STEM-Certified Aquarium

## TROPICAL DIVER

GIANT CLAM

CLOWN FISH

JELLIES

UNICORN FISH

Coral need some lights for food and to grow,  
But they are animals, just so you know!  
And when you look upon these shelves  
Built by the corals themselves,  
Know that their needs are met  
Food, air, water and shelter  
all of these they get.

## OCEAN VOYAGER: BUILT BY THE HOME DEPOT

ZEBRA SHARK

GREEN SEA TURTLE

COWNOSE RAY

WHALE SHARK

Have you ever seen a fish as big as a whale  
The largest ones aren't even male.  
That would be Alice, don't forget her name  
And she's a whale shark, what a dame.  
Although they are so big,  
They eat animals smaller than a fig!

## COLD WATER QUEST

LOBSTER

AFRICAN PENGUIN

SOUTHERN SEA OTTER

BELUGA WHALE

Snowy white, icy cold  
Belugas look the same or so I'm told.  
But as a calf they are so gray  
Next to their mom, they mustn't stray.  
Drinking lots of milk and eating lots of fish  
Growing into juveniles is their wish.

## SOUTHERN COMPANY RIVER SCOUT

RED-EARED SLIDER TURTLE

ASIAN SMALL CLAWED OTTER

RAINBOW FISH

AMERICAN ALLIGATOR

The smallest of my kind you see,  
An Asian small clawed otter, that's me!  
Tiny paws for eating food  
Mollusks put me in my best mood.  
Little shells to crack apart  
The insides are my favorite part
